DESCRIPTION

The semi-automatic BCS-200SM is the ideal device for small artisan enterprises. It can be mechanically connected to any filler. By operating synchronically with the filler, the BCS-200SM enables a precise portioning of sausage products by weight: the pneumatic casing brake ensures that each portion receives the same amount of filling. The double clipper is ideal for closing sausage products (whether log- or ring-shaped) in a caliber range of 25 – 100 mm.

HIGHLIGHTS

- Automatic filler control
- Compressed air operation - no electrical power required
- Corrosion-proof stainless steel and plastic construction
- With mobile, height-adjustable undercarriage
- Pneumatic casing brake
- Pivotal clip head for loading the filling tube

OPTIONAL EXTRAS

- Special blade for soft casings
- Automatic loop feder
- Automatic string feeder set
- Stamps pneumatic pressure regulator
- Air preparation station

TOOL CHARACTERISTICS
