DESCRIPTION

A specially designed single clipper in a horizontal version is an ideal machine for closing products, such as ice cubes or other liquids, e.g. soups in bags. If needed, the clipper can be equipped with an aeration system — oxygen dosing, perfect for packing tropical fish. The CLIP SYSTEMS table-top single clipper BCS-700SC-H uses S-700 clips thanks to which tight closing of various casings, including bags of different thicknesses, is possible.

APPLICATIONS

Specially developed for bag closure of food and non food products. Vertical clipper position makes easier packing liquid products or products in non standard size like poultry.

ADJUSTABLE CLIPPER STAND POSITION AND CLIP CLOSURE

Clipper position can be easily changed on the right height suitable to the packed product.

Adjustable stroke limit allows gently set up clip closure to be adjusted individually to the sensitivity of material or required tightness. Justed individually to the sensitivity of the material or the required tightness.

BASE CHARACTERISTICS

Width	Length
240 mm	277 mm
9.45"	10.90"

TOOL CHARACTERISTICS

Height	Width	Length	Weight
