DESCRIPTION

A specially designed single clipper in a horizontal version is an ideal machine for sealing products, such as ice cubes or liquids like soups in bags. If needed, the clipper can be equipped with an aeration system for oxygen dosing – perfect for packing tropical fish. The CLIP SYSTEMS table-top single clipper BCS-700SC-H uses S-700 clips, ensuring a secure seal on various casings, including bags of different thicknesses. Our table-top single clippers, BCS-50SC, BCS-175SC, and BCS-700SC, are also available in horizontal models. An additional benefit: both the standard and horizontal clipper versions can be equipped with an automatic trigger.

APPLICATIONS

Specially developed for sealing bags containing food and non-food products. The vertical clipper position facilitates the packaging of liquid products or non-standard items, such as poultry.

ADJUSTABLE CLIPPER STAND POSITION AND CLIP CLOSURE

The clipper position can be easily adjusted to the right height suitable for the product being packed.

The adjustable stroke limit allows the clip closure to be set gently, tailored to the sensitivity of the material or the required tightness.

BASE CHARACTERISTICS

Width	Length
240 mm	277 mm
9.45"	10.90"

TOOL CHARACTERISTICS

Height	Width	Length	Weight
1420 mm	565 mm	330 mm	20,5 kg
